DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall et al (US Patent 2,411,209) or Erlansden (US Patent 960,526).

Hall and Erlansden teaches a rotary cutter bit in figure 1-6 and figures 1-12, respectively, including the body defining at one hole (element 17 of Hall or h, h' of Erlansden) extending from the outer surface and in communication with the at least one chip box (element 3 of Hall or y, y' elements of Erlansden) whereby the at least one hole has a leading end and a trailing end (The examiner considers the leading end and trailing end of Hall as 17 extending from one end to other end as seen in fig. 6 or the leading end and trailing end of Erlansden as extending from other portion of element f, f' to the element z, z') and a bearing (fig. 1 of Hall or fig. 9 and 10 of Erlansden).

Allowable Subject Matter

Claims 9-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note attached Reference Cited.
